

## Libraries to install

- DHT(Adafruit)

- ESP8266 library(first add [https://arduino.esp8266.com/stable/package\\_esp8266com\\_index.json](https://arduino.esp8266.com/stable/package_esp8266com_index.json) file preferences > additional boards manager URLs . Go back to Tools > Board > Go to boards manager > search for ESP8266 board > install > select Generic ESP8266 Module)
- (LiquidCrystal\_I2C.h) - go to sketch > include library > add .zip library> [https://drive.google.com/file/d/1dwAGZO1PIMOvlagwgDCHrAP9upCDzACJ/view?usp=s\\_haring](https://drive.google.com/file/d/1dwAGZO1PIMOvlagwgDCHrAP9upCDzACJ/view?usp=s_haring)

## Connecting ground and vcc

Ground: - part of breadboard

Vcc - varies basing on the different elements but it originates from the ESP8266 board

Vcc of DHT11: 3v3

Vcc of LCD:5v

## Connecting the dht11 sensor

S pin :D5;

Middle Pin :Vcc :3v3 on ESP8266 board;

Negative Pin : Ground on the board

## Connecting the LCD

SCL pin:D1

SDA pin:D2

Vcc pin:5V

GND pin:Gnd

## Buzzer

S:D6

Middle Pin:5v

Negative pin : Ground

**LEDs**

- Put resistors on the negative pin and connect to ground
- Connect the Red pin on the d4 of esp8266 board;
- Connect the Green pin on the d7 pin of the esp8266 board;
